Dhaka, Bangladesh

SUMMARY

I am focused and devoted. I am working with PHP and JavaScript last 2 years. I want to work with passionate team members & want to work on exciting projects & technologies to help my organization.

EXPERIENCE

Full Stack Software Engineer

at **Neural Semiconductor Ltd.** 7/2019 - Ongoing Dhaka, Bangladesh

From planning about how to give life to a idea into a project, creating them from scratch was responsibility.

Missions:

- Work along with other team members to publish magento VPS plugin into magento marketplace.
- With a strong focus creating the frontend of Assessment Center project & also contribute to the backend.
- Monitor Sheypoor site's performance and keep its page size below 300kB.

Main projects:

- Develop Assessment Center project UI, frontend and communication with backend(Laravel, Blade, Mysql).
- Develop Assessment Center project Backend using REST api in laravel(Laravel, REST).
- Develop Employee management system frontend in React(React).

Software Engineer

at **Sycorax Technology** 10/2018 - 06/2019 Dhaka, Bangladesh

Worked on Codeigniter framework to develop a system to use it for future projects.

Achivements:

- Worked with team members to develop an customize ERP for Pacific Furniture.
- Developed a travel agency system with payment features to maintain their business.
- Develop a form-builder(like Google Forms) to create dynamic registration forms.
- Design and develop the new website's UI.

Missions:

- Pacific ERP system (Codeigniter, JS, Mysql)
- Travel agency solution(Codeigniter,JS,Mysql)
